

Event-time profiles across 2-km distance bands

Bald Eagle and Glaucous-winged Gull are focal waterbirds; American Robin is a comparison species, not a negative control.

Early pre (-14 to -8 d)   Immediate pre (-7 to -1 d)   Spawn start (0 to 3 d)   Early egg (4 to 14 d)   Late egg (15 to 28 d)

Each band has its own days -28 to -15 reference, so comparisons are within band rather than between bands. Translucent ribbons are 95% confidence intervals.
