

Reporting checklist and applicability

No study-design-specific reporting checklist is mandated in the current *Marine Environmental Research* Guide for Authors.

Item	Status	Location or rationale
Registered observational questions and estimand	Complete	Introduction; Methods
Eligibility and observation-process covariates	Complete	Methods
Response-state definitions	Complete	Methods; Supplement
Exposure and concurrent-event linkage	Complete	Methods; Supplement
Multiplicity and family definitions	Complete	Methods; machine-readable audit
All prespecified models reported	Complete	Results; Supplement; companion CSVs
Singular-fit disclosure	Complete	Methods; Results; Supplementary Table S6
M29 specificity panel	Complete	Abstract; main Results and Discussion
Limitations paired with affected interpretation	Complete	Limitations
Data/code availability	Complete	End matter; author declarations
Funding, conflict, contributions, ethics	Complete subject to human confirmation token	End matter; author declarations
SAGER sex/gender reporting	Not applicable	Checklist-level bird outcomes; no sex/gender analysis of humans or animals
Graphical abstract	Optional, not supplied	Encouraged rather than required
