

Response to reviewers

Manuscript: “Spatiotemporal associations between coastal birds and Pacific herring spawning in British Columbia”

Journal: *Marine Environmental Research*

Manuscript number: [TO BE ASSIGNED]

Dear Editor and Reviewers,

Thank you for the careful assessment. Changes are described point by point below. Line numbers refer to the revised manuscript with continuous line numbering. Statistical estimates remain tied to the Stage 4A v2 analysis freeze; any permitted manuscript-generation correction will be documented explicitly.

Change: [Page and line; exact revised text or explanation]

Revision integrity checklist

- ☐ Every comment is reproduced and answered.

- ☐ Page and line references resolve in the revised manuscript.
- ☐ New analyses, if any are requested, are not run without an explicit design and authorization decision.
- ☐ No frozen estimate, warning, exclusion, or multiplicity family changes silently.
- ☐ No protected identifier or record-level content appears.
- ☐ Revised figures, tables, citations, and supplementary files pass provenance and consistency checks.
